About This Game

Take control of a ship of your choice and explore a randomly generated galaxy in Dissimulation!

Dissimulation is a top down, retro styled shooter set in a randomly generated galaxy. Dock at space stations and land on randomly generated planets, populated by alien flora and fauna.

Upgrade your ship by buying new weapons and armor, or craft them yourself! The upgrades will be vital in fighting off pirates, androids and even the galactic police force!

Attack elite Capital ships in brutal space battles to board the wreckage and kill the captain.

Slaughter the inhabitants of a colony or space station at your own risk – the structure may come under siege by galactic police.

Key Features:

Randomly Generated Galaxy

Space stations, planets and nebula are all randomly generated to provide a unique gameplay experience for each user.

Story

Dissimulation features a full single player story. While exploring, you will encounter story events which will ultimately reveal the dark secret of this galaxy.

Exploration

A key element of Dissimulation is exploration. You can land on nearly every planet to explore its surface. Each planet will be unique with its own weather, plants and wildlife. Some will be nothing more than an arid, barren wasteland, devoid of any

natural life. Some may be lush, with a climate similar to the Earth's. Depending on these conditions, the human structures will change. The more barren planets may only have a single research station or mining colony. The more picturesque planets will likely be popular galactic tourist destinations.

Resource collection

To acquire resources, you must mine asteroids or natural structures on planets. The yield of the planet's structures is strongly influenced by various conditions on the planet, particularly the chemical makeup of the crust. However, Dissimilation is specifically designed to give players the maximum amount of freedom. It is therefore possible to play the game without collecting a single mineral or touching a crafting table.

Loot System

A variety of containers and other items of interests are randomly generated on each planet's surface. Venturing out from the colonies and research stations is often rewarded by finding crashed escape pods or old cargo containers. These structures may contain valuable items or credits to aid you on your journey.

Ship Upgrades

There are a huge variety of upgrades for your ship. These upgrades range from simply installing larger fuel tanks in order to explore for longer durations of time, to increasing power to the laser cannons for a higher intensity attack.

(Rogues in Remballo)

Rogues in Remballo is a Fifth Edition adventure for 4–6 first level characters, a city adventure that gets the characters embroiled in strange plots, sinister intrigue, and fierce battles. Is the thieves guild of Manas encroaching on the territory of the Remballo guild? What is hidden in the sanctuary-courtyard known as the Four Corners? How is the powerful banking house of Borgandy involved with all of it? What starts as a straightforward mission actually involves a host of complications — some of which can be deadly if the characters don't play their cards right. **Rogues in Remballo** is set in the Borderland Provinces region of the *Frog God Games Lost Lands* setting, but can be played on a stand-alone basis in any city.

Very fun. Great co-op game!. You Got Brouzouf
my legs are broken
my legs are ok

moral of the story is invest in those cyberlegs. my friend got addicted to this game and now we play it every time he arrives

i do not know the meaning of any other game

please help

i only know of locosoccer. at least you tried. Probably not worth \$15 USD but there is something very addictive about this game.. Shoe Throwing Simulator 2

It looks like fun but I can't login.. For a Media player that replaces the use of multiple programs to handle a variety of formats, I am satisfied with this. I waited for the summer sale price to try it out and would recommend this.

The only negative I came across is the menu system takes a bit to get use to, Also the ability to at lease have Visualizations while music is playing seems to be lost to me\u2026. still playing around with it.

9/10

Great, got it to work thanks to romulous [developer].

Step by step for others in the same spot,

\u2022Ctrl+ O (or right click and select options\setup)

\u2022Select \u201cswitch to advanced mode\u201d (if you're not in already in it)

\u2022From the drop menu on the left, select \u201cplayback\u201d, \u201cAudio\u201d, and highlight \u201cvisualizations\u201d. (Or just use the search feature at the bottom and input visualizations)

\u2022Hit \u201cAdd\u201d, and find the plugins you have on our PC.. Think! fast to heal theres no time to search back pack. 666 Ram? That isn't suspicious at all (btw great soundtrack). this is an insult to my intelligence
